Project Profile: R-axis

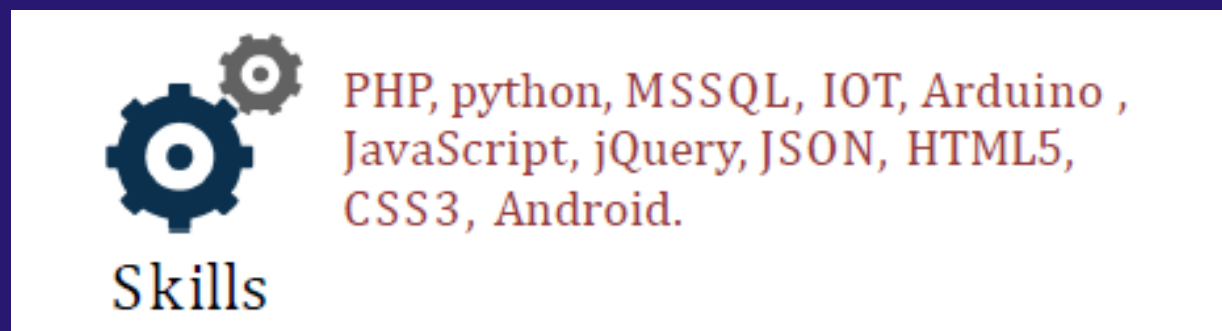

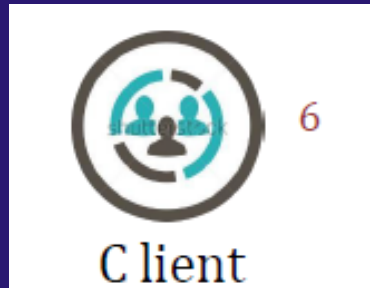

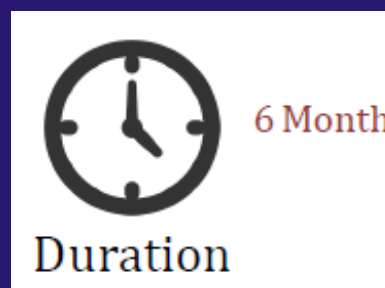

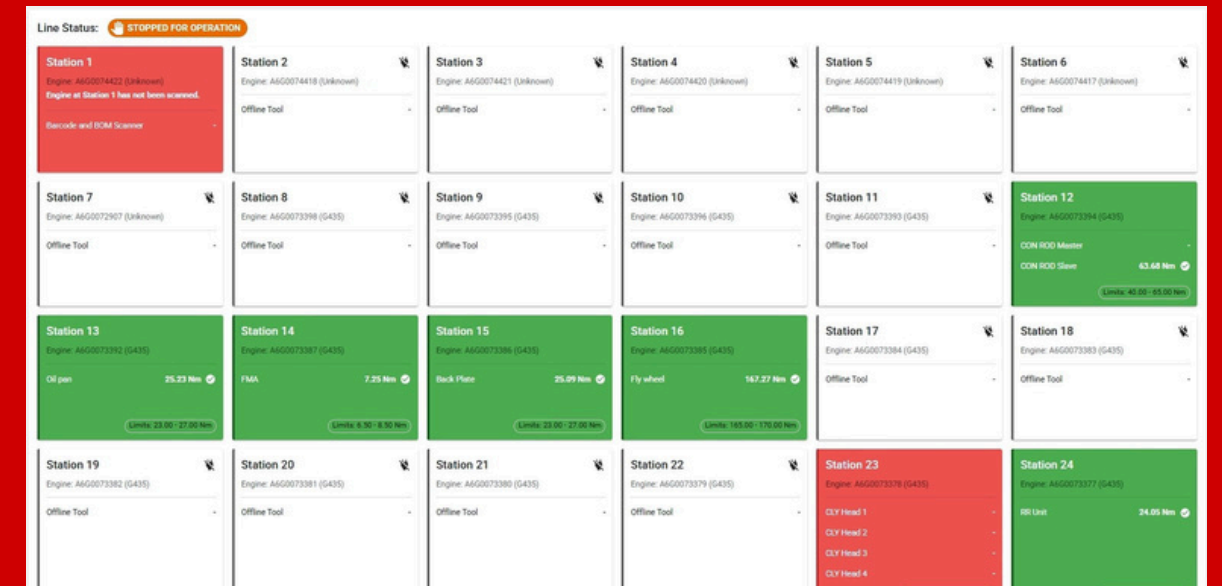

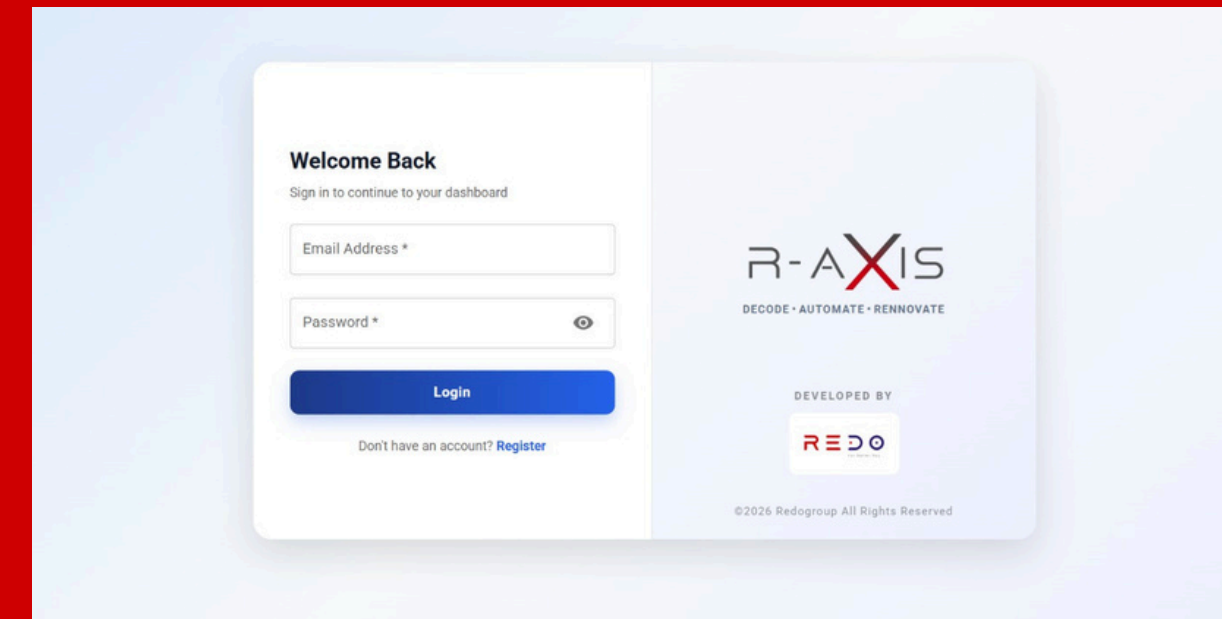

R-axis is a data acquisition system designed to gather critical data from CNC machines used in the manufacturing industry. It provides a real-time monitoring solution that enables manufacturers to optimize their production processes, reduce downtime, and increase overall efficiency.

Benefits

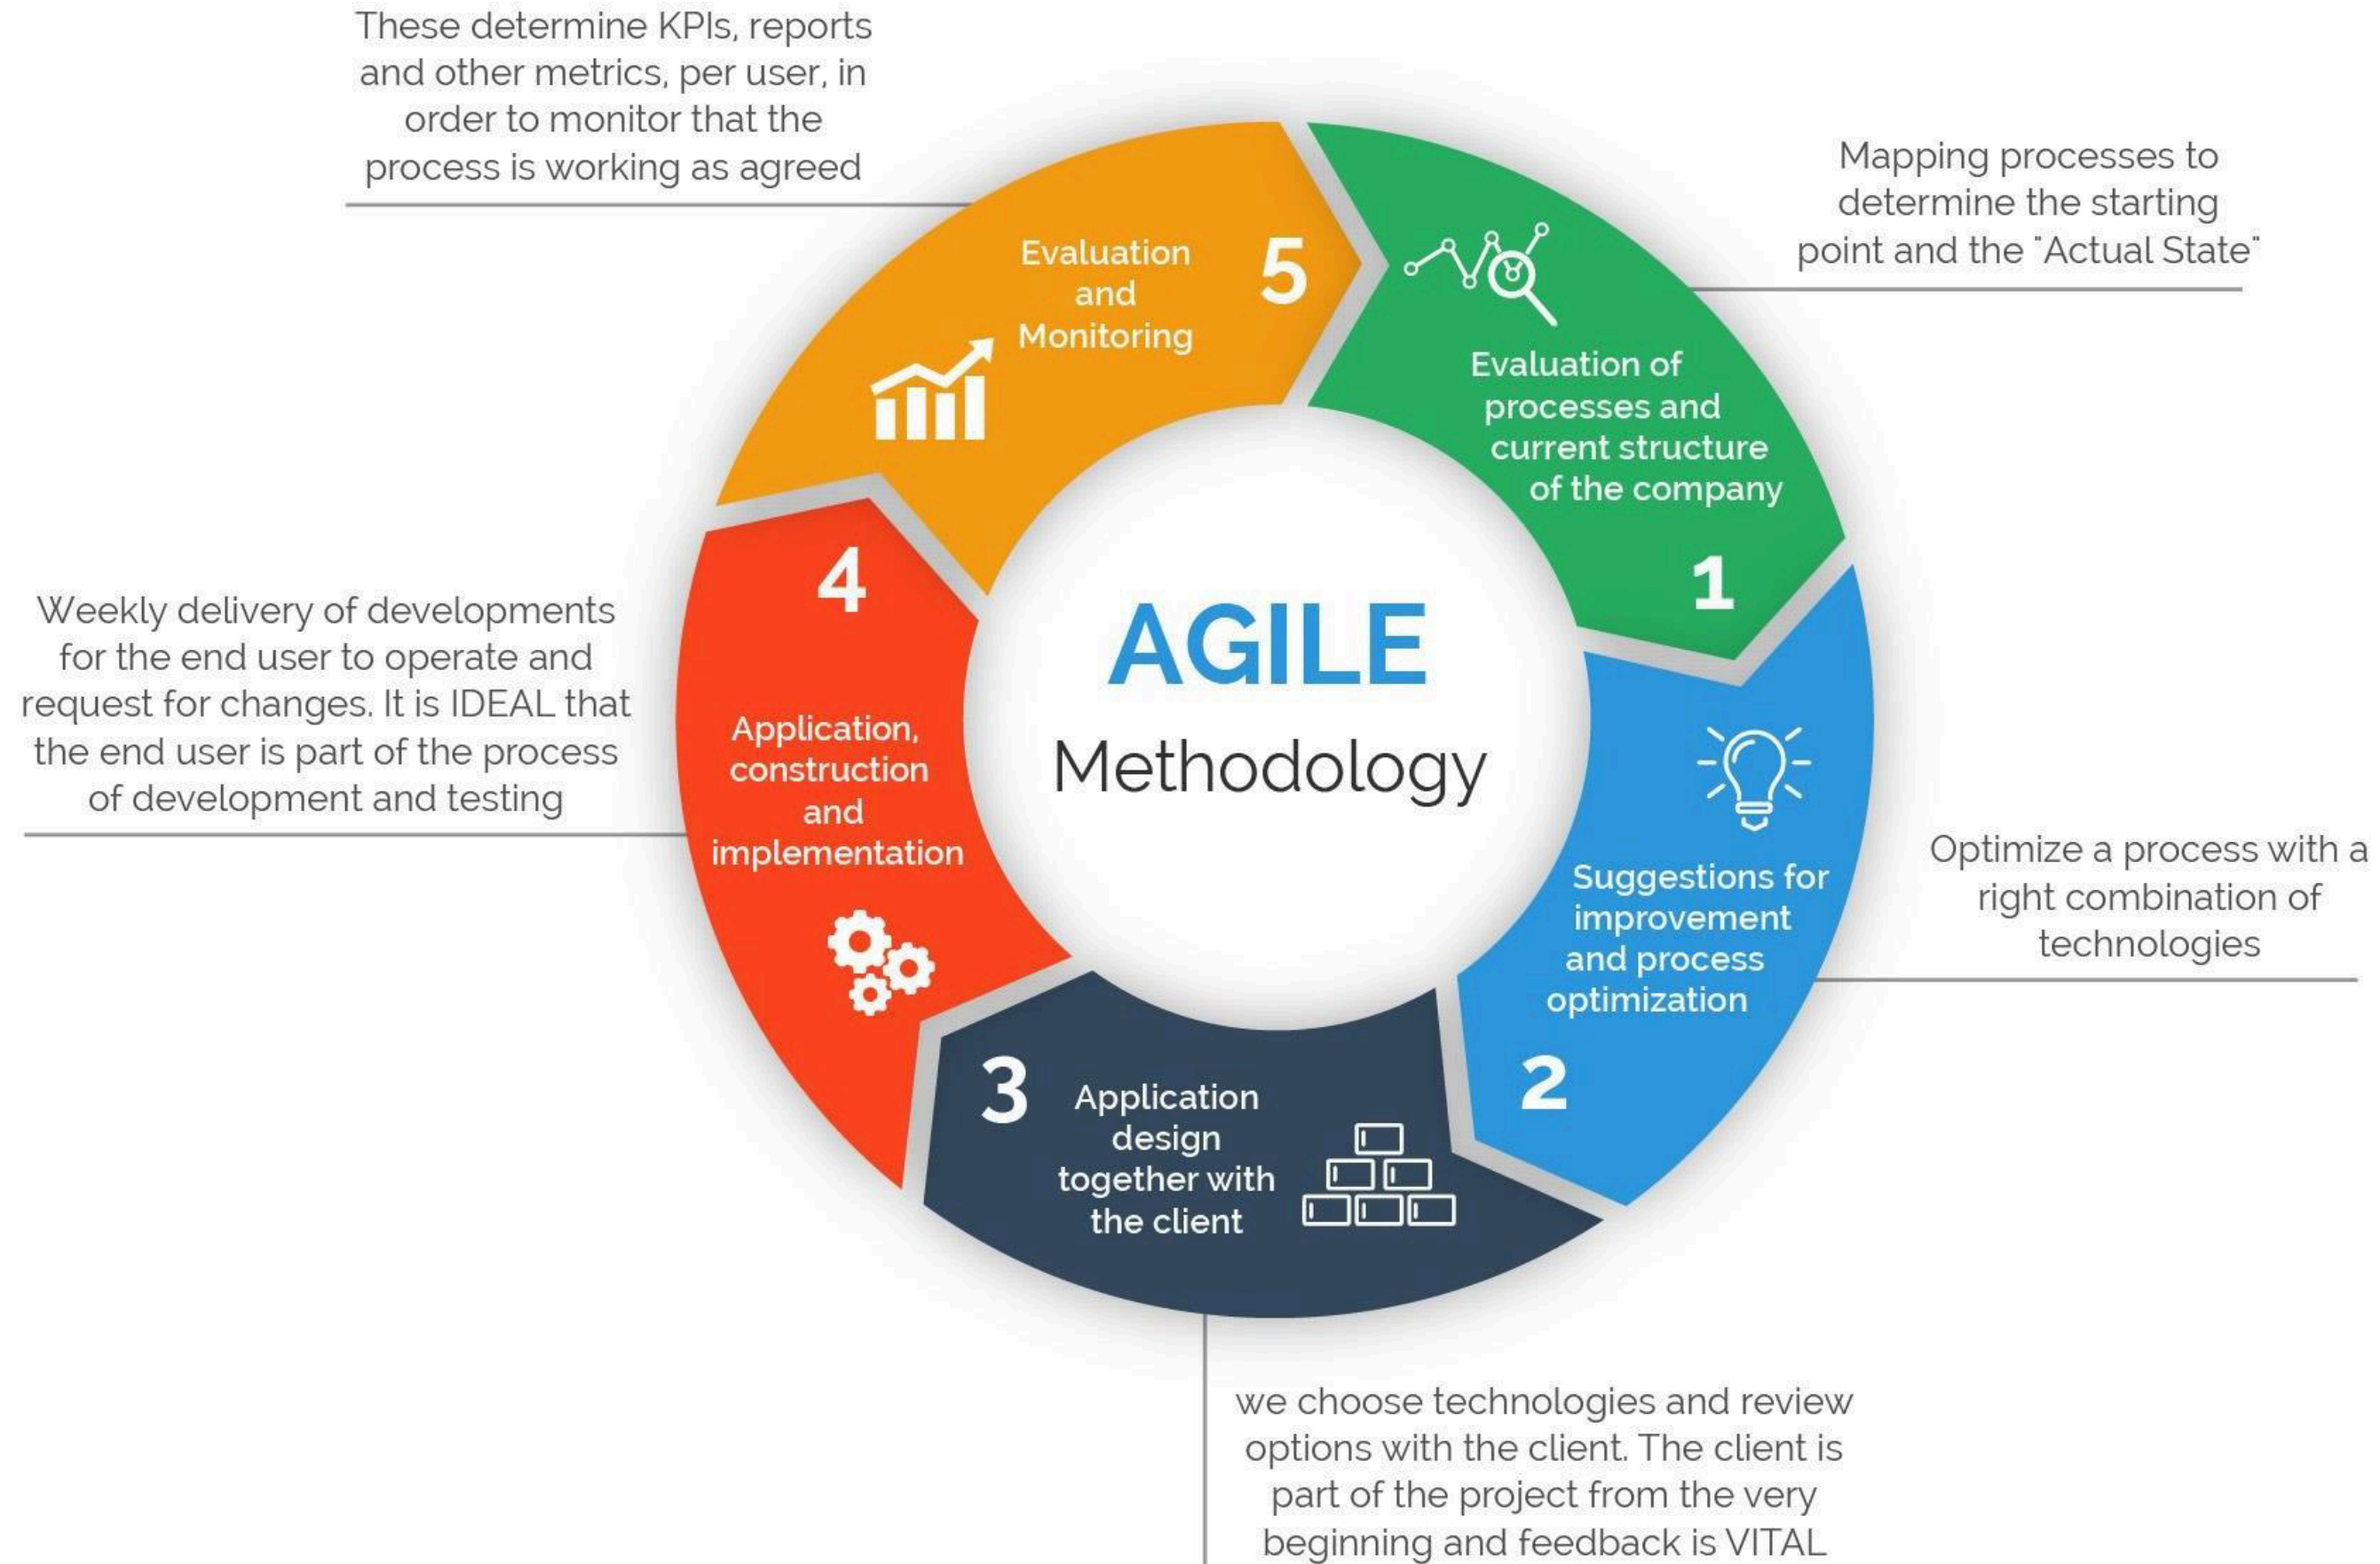

- Improved Manufacturing efficiency
- Automated Data collection and analytics
- Real time shop floor visibility
- Easy access to real time data
- Custom Reporting

Achievement

- Improve operator Engagement and overall company communication
- Reduced Production waste for increased profits
- Increased OEE
- Real time shop floor alerts and notification

Methodology & Framework

Enagement Practices

Fixed Cost Model

If your company or you has a fixed set of software development requirements or ideas for creating new solutions or service, then the fixed cost model will be the best suited for you.

Hourly Model

If you or your company has software development requirements that would demand adopting changes and flexibility, then the hourly model is best suited for you

T & M Model

You can hire our dedicated resources as well. They will only be working on your project. A daily timesheet of your work will also be submitted to you. Even though you hire dedicated resource.

Partner With Us

You can also partner with us for your growth, diversification on a mutual benefit basis. We will give you qualified and experienced professionals with sound domain knowledge.

Managed Offshore Development

Contract

If your company or you has a fixed set of software development requirements or ideas for creating new solutions or service, then the fixed cost model will be the best suited for you

Concept

We work out the work details and define timelines and milestones based on requirements

Working hours

We deliver 8hrs a day and 5 days a week. Effectively 170Hrs of work a month

Discuss/Interact

We schedule regular scrum meetings & discussion sessions to keep you in the loop

Deadlines

We work on defined deadlines based on milestones and get the delivery as committed

Deliver

We make a complete delivery of work done based on assignments with testing and then deploy

Valued Customers

Thank You!
